

Full Suite of Tailored COVID-19 Disinfecting and Sanitizing Services

ASRC Industrial is redefining nationwide rapid response and preventative disinfecting and sanitizing services for COVID-19. We are aligned with our client's commitment to health and safety especially during this serious and unprecedented pandemic outbreak. Our team of trained and experienced personnel has a full range of solutions and will mobilize the correct equipment to decontaminate/sanitize the impacted areas of your operations.

Level One Services – Recommended Preventative Cleanings

- Cleaning before disinfecting is the first step in protections using a handheld pump sprayer and quantitative wiping techniques using microfiber technology.
- Sanitizing using CDC recommended disinfectants across all high touch areas.
- Onsite recommended cleaning on your schedule (Continuous / Daily / Weekly).
- One-time deep cleaning available
- Design / Operation / Maintain temperature check stations.
- Self-Performance and liability training available (we will train you).
- Customized written Plan to communicate approach to your needs with site specific protocols and procedures.

Level Two Services – Suspected and Positive Sanitizations

- Fogging machines available for all levels of required sanitizing/ decontamination.
- CDC / EPA N-List approved SARS-CoV-2 disinfectants.
- Adenosine Triphosphate (ATP) Testing for Biological Residue on Surfaces available.
- Microbial Assessment, Hazard Identification and Performance Plans
- Microbial Remediation Design
- Performance Reporting (Data Management, Quality Control and Assurance programs, as needed).
